GLACIER NATIONAL PARK

Lying in its entirety in a rugged section of the MONTANA Rockies, Glacier National Park has approximately 40 glaciers and 200 glacial lakes. Crystal clear streams offer fishing opportunities and no license is required. Fields of brilliant mountain wild flowers, cascading waterfalls, sheer cliffs, dense forests, black and grizzly bears, marmots and proud mountain goats and mountain sheep offer an ever-changing panorama. Going-to-the-Sun Road, a spectacular east-west 50 mile drive crosses the Continental Divide at Logan Pass and traverses the towering Garden Wall. It opens about the first week in June and remains open well into October. Much of the park is accessible easily by car and nearly a thousand miles of hiking trails lead deep into more isolated areas. All year around accommodations are available on the park's fringes. Accommodations in the park are open from about June 10 -Sept. 10. This million-acre wonderland was established as a national park by Congress May 11, 1910, and is the U.S. section of the Waterton-Glacier International Peace Park. Glacier National Park is administered by the National Park Service. Address: Superintendent, West Glacier, Montana 59936.
